While carrying a camera around all day was different, it was certainly a cool and interesting experience. Did get stopped by Mike Scott at one point though.

One of my issues with this assignment was that I was unable to make it to a lab to work on the creative side of it. This was when the first swamp of projects started coming in and stress started getting the better of me.

I had been able to use iMovie before, so the basic controls were simple. It came down to narrowing the clips to something that was both understandable and was able to express myself.

Comments:

This was ultimately a crippling part of my experience in the lab. One key issue was equipment. The only place to get the equipment needed was from Chadbourne Hall between 12 and 2 (a time which I was in class and couldn't get there). Also, even if I could get out, the \$20 fee, while fairly reasonable, was something I didn't have on me personally. All this was also during the 2nd swamp of projects which took an ultimately bigger priority.

Total: /100points
